North American Bat Research Conference

The Eighteenth North American Bat Research Symposium will be held October 13-15, 1988 at the University of Calgary in Calgary, Alberta, Canada. Many of North America's most preeminent bat scientists will be in attendance and presenting papers on their latest research, covering such topics as conservation, ecology, behavior, echolocation, physiology and more. The symposium is open to attendance by the general public, and interested members are invited to attend. Pre-registration (September 1st deadline) is recommended. For information on accommodations and a registration form, write:
