"Original" Bat Houses Now Made by BCI

BCI is pleased to announce that we are now manufacturing our own bat houses in Texas. This allows us better quality control, faster delivery, and improved customer service. The new houses are handmade of western red cedar with an emphasis on craftsmanship and durability.

Two sizes are available through our catalogue: the "original" and the new "macrobat" dwelling. Those of you who are retailing bat houses will want to call us for wholesale information and prices.
