New Children's Video

BCI's first children's video program, "Very Elementary Bats," is now available through the BCI catalogue. The seven-minute program is designed to introduce children aged 4-7 to bats and help dispel some of the common myths before negative stereotypes become established. Pre-school and elementary teachers will find it an excellent companion to the *Educator's Activity Book About Bats*, which comes with it. BCI greatly appreciates Founder's Circle member Earl Biffle, a long-time supporter, for funding production costs.
