

BAT GARDEN PLANT LIST

Mojave Basin & Range:

St. George UT, Las Vegas NV, Kingman AZ, Lancaster CA

This is a list of plants native to your area that flower at night. The nocturnal blooms will attract insects that bats love to eat. In return, insectivorous bats will eat many of your unwanted garden pests.

For a tasty, long-lasting buffet, choose 2-3 plants that bloom in spring, summer, and fall. To really boost your garden's bat-appeal, plant a tree! Trees attract moths (a favorite food for bats) and provide a cozy spot for many bats to roost. Learn more about gardening for bats at batcon.org/gardening
